

Oona Campbell is a reproductive epidemiologist with degrees in demography, epidemiology and biology. She led the [maternal health and newborn health group](#) until the end of 2020 and is currently acting head. Her areas of expertise include measurement of maternal morbidity and mortality, perinatal mortality and evaluation of different modes of delivering maternal health and family planning services.

She has worked in the Middle East (Lebanon, Egypt, Jordan, Syria, Turkey), in sub-Saharan Africa (Benin, Nigeria, Ghana, Senegal, Zambia, Tanzania & Uganda) and in India, Nepal, Indonesia and Brazil. She has collaborated with a number of Ministries of Health, agencies and foundations (including DFID, WHO, World Bank, UNICEF, USAID, MotherCare, the Ford Foundation, the Bill and Melinda Gates Foundation, and the MacArthur Foundation).

She co-founded the MARCH Centre for Maternal, Adolescent Reproductive and Child Health at the LSHTM and led an academic department with over 150 staff members.

She is currently working on projects in India, Nepal, Lebanon, Liberia, Senegal and Morocco, and with Zeina Jamaluddine and Miho Sato on data from Palestinian refugees.
